## DETAILED ACTION

1. Applicant's arguments filed 09/26/05 have been fully considered but they are not persuasive. The rejections follow.

### ***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fantle Jr. in view of Langan.

The Applicant is referred to the first Office action, mailed 06/27/05.

The Applicant has argued that neither Fantle nor Langan teach, disclose or suggest a special designation zone or pitcher zone 23 that is not associated with any inning number. The Examiner takes the position that the claimed "special event designation has zones, each of which is associated with the play or event of the baseball game but is not associated with any inning number" is simply **printed matter**. Thus, only difference between Fantle's rows and columns of zones, and the claimed "special event designation....." resides in the meaning and information conveyed by printed matter. Such differences are considered **unpatentable**, *Ex parte Breslow*, 192 USPQ 431.

Furthermore or in the alternative, Fantle, Jr. discloses the claimed invention except for the "special event designation....." set forth in the claims. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the indicia on Fantle's bingo game sheet by providing extra rows or columns

of zones to represent any event that might occur in a baseball game (e.g. a row of zones representing Manager or Player Ejections, Fan Interference, Rain Delay, a row of zones representing Extra Innings, etc.) since it would only depend on the intended use of the assembly and the desired information to be displayed. Further, it has been held that when the claimed printed matter is not functionally related to the substrate, it will not distinguish the invention from the prior art in terms of patentability. *In re Gulack*, 217 USPQ 401, (CAFC 1983). The fact that the content of the printed matter placed on the substrate may render the device more convenient by providing an individual with a specific type of event or play in a baseball game does not alter the functional relationship. Mere support by the substrate for the printed matter is not the kind of functional relationship necessary for patentability. Thus, there is no novel or unobvious functional relationship between the printed matter (e.g. bingo game sheet) and the substrate (e.g. special event designation....) which is required for patentability.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
